IOVS 2014

**Figure S1**

![Figure S1](image)

**Fig. S1.** Published, disease-associated TULP1 gene exonic (below the gene) and intronic (above the gene) mutations on a scheme of the genomic structure. Boxed mutations are those identified in this patient population. Bold indicates novel mutation. Grey boxes indicate protein domains. MPD, minimal phagocytic determinant; PPBD, phagocytosis prey-binding domain.\(^20\)
