Supplemental Fig. 2 Representative images of P6 retinal whole mounts after intravitreal injection of vehicle (saline; a), [Dap3]-Ghrelin (81nM; b), JMV-2959 (56nM; c), or both (81nM of [Dap3]-Ghrelin and 560nM of JMV-2959; d), as well as GHRP-6 (24nM; e), [DLys3]-GHRP-6 (24nM; f), or both (24nM of GHRP-6 and 240nM of [D-Lys3]-GHRP-6; g) during normal development. The area chosen for density calculation is marked by the red box (h).
