Representative power spectra at 5.859 Hz (top left), 11.718 Hz (top right), 17.578 Hz (bottom left), and 23.438 Hz (bottom right). The means of the fundamental component (1F), second harmonic component (2F), third harmonic component (3F), fourth harmonic component (4F), and fifth harmonic component (5F) are shown. The amplitudes of the WT, Pika<sup>−/−</sup>, and mGluR6<sup>−/−</sup> mice are shown in black, red, and blue columns respectively. Error bars represent the standard error of the means.
