Supplementary Figure S1. The forest plots of meta-analysis for rs225396(T) with

(A) nAMD and (B) PCV after adjusted for age and gender. Squares indicate the study-specific OR. The size of the box is proportional to the percent weight that each cohort contributed in the pooled OR. Horizontal lines indicate 95% confidence interval (CI). A diamond indicates the pooled OR with its corresponding 95% CI. nAMD: neovascular age-related macular degeneration; PCV: polypoidal choroidal vasculopathy.
